

SS&C Intralinks InView™

Manage all your private market investments in one clear view.

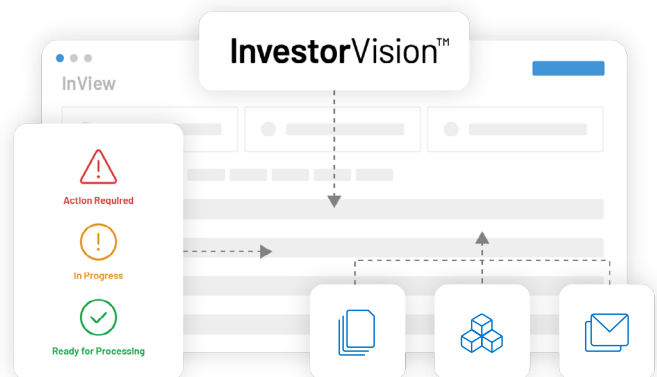

When fund managers share information in different formats from multiple sources, it can be a challenge to access the information you need quickly. Manually aggregating and inputting data across your funds into internal systems can create onerous administrative tasks within your organization – especially with limited bandwidth and resources. Do you want clarity and more insight into the performance of your private market investments?

Intralinks InView is a purpose-built portal designed for the way you work. This powerful solution aggregates all your fund reports into a single, intuitive UI, streamlining your operations and giving you real-time access to fund investment data, so you can better analyze your portfolio and make data-driven decisions.

- Aggregate documents across funds from multiple sources – including InvestorVision™, and other external systems – into a single portal
- Track and monitor all statements and financials from your private market fund investments
- Stay on track with your fund managers with seamless workflows and relationship management capabilities
- Monitor and communicate with GPs for missing documents, discrepancies and general inquiries
- Generate strategy-specific and data collection workflows
- Track key contacts and relationships – manage meetings, tasks and notes

Streamline processes and save time and resources.

Get a complete view of your private market portfolio with InView

No more logging into multiple portals to access your reports.

Benefits:

All your private markets investments in a single portal.

Document management

Time savings

Single login

No downloads
