

Redaction Services

Intralinks Deal Services

Focus time and expertise on high-value work. Not on tedious redactions.

Redacting sensitive data like customer personally identifiable information (PII) – names, contact information, Social Security and/or driver’s license numbers, financial or medical records, biometrics, etc. – is extremely tedious and time-consuming yet requires laser focus and accuracy. There is no room for error, especially when a high-stake deal or project is on the line.

Enter Intralinks Deal Services. Our team manages the entire process – from activating AI-powered scanning to confirming via manual review, queuing documents for approval, notifying reviewers and maintaining non-redacted versions. This frees up your valuable staff, deal team or project group to focus their time and expertise where it’s really needed – on closing deals, meeting clients and maximizing ROI.

Let Intralinks do the work. Benefit from:
